

Future

The frontiers, boundaries, politics, benefits,
The power, the conquest, jealousy,
Possession, religion, weapons and weapons
Racism, fascism, violence

That's what I see on my TV
All I can do is to turn it off or just mute the sound
All I can do is to observe this world that's going mad

Everyday pictures of war
Children dying don't know why
Trying to understand why they deserve
So much violence, so much pain
Why their prayers are still vain
Is there's someone somewhere to stop them?

You know this is the human world
When the man is becoming wild
This is when the human world sure of his supremacy
Is destroying, killing for free

More and more endangered species
Intensive deforestation,
The earth is so exhausted we must stop
Making money for today won't save us from the sky so grey
Imagine tomorrow what will remain
