

ASLEEP

You're lying here beside me
As if we've just made love
You seem to be so quiet
With this blue sky above
I'm dressing so slowly
Time must have been stopped
All around goes slow down
Now I've got to go
Now I've got to go

What have I done to you?
Just a revenge for the harm you do
I just don't care about what people think
I have no regrets my life with you wasn't pink

You played with my heart babe
My limits had been reached
This time was too much for me
It's more than I can bear
I hope you are happy
I won't scream no more
You're free to live your life
If we can say that
If we can say that

What have I done to you?
Just a revenge for the harm you do
I just don't care about what people think
I have no regrets my life with you wasn't pink

You'll never stand up again
After this night with me
I hope you have suffered like me when you leave
My head now is spinning round
I can't bear blood's sight
With this hole in your heart
Baby we look alike
